

# PRO Electronics Upgrade Program

GIVE YOUR X1000 OR YOUR WORKBENCH-GEN1 3D PRINTERS THE **PRO** BOOST

## Key Benefits For Only \$5,850\*

- A WORKBENCHPRO'S TOUCH SCREEN BRAINBOX** (HMI – Human Machine Interface) comes equipped with a 32 bit chip and optimized firmware to produce the highest quality, accuracy and resolution detail for your 3D prints. The BrainBox is 1000% faster and 1000% smarter than our last generation BrainBox. This quick-swappable box provides for future upgrades without the need for a technician.
- B** Not in the office? **WI-FI ACCESS** allows you to login through your mobile device to control the WorkbenchPro. Remotely stop and restart prints anywhere you have Wi-Fi access. Also, get detailed print information and statistics.
- C NEW EXTRUDER & VOLCANO** hot end (standard) provides for 2x faster printing. Your printer will also receive electrical compatibility enabling you to take advantage of our future state-of-the-art extruder advancements - unrivaled by anything available on the market today.
- D TOUCH PROBE** provides state-of-the-art Auto Mesh Bed Leveling up to 441 points. Shortens set-up times and increases productivity.
- E Fully Programmable ADVANCED COOLING SYSTEM** provides rapid cooling to the print head for optimal material cooling and increased print speeds and print quality.
- F ENHANCED FILAMENT FEED SYSTEM** Bowden Style Tubes offer superior feed technology. Coupled with the Dual Filament Sensors, the system helps you avoid filament breaks, tangles and running out of filament.
- G REBUILT MECHATRONICS / TUNE-UP** includes refurbished actuators, lead screws and nuts. Build platform will be re-validated for squareness, flatness and bed leveling. Glass will be inspected and replaced if necessary.
- H 90 DAY WARRANTY** is included with your upgrade. An additional extended one (1) year warranty can be purchased for \$2,750.

\*Customer is responsible for inbound and return shipping costs.  
Additional Step Servo motor upgrade can be purchased for \$3,000.
