

FOR IMMEDIATE RELEASE

3D Platform announces the Pre-Release of the WorkCenter 500

Roscoe, Illinois, USA – April 6, 2018 – 3D Platform (3DP), a global leader in manufacturing large-format, industrial-strength 3D printers, is pleased to announce the pre-release of the WorkCenter 500 – a new extra-large format 3D printer.

“The overwhelmingly positive response to 3DP’s Excel machine has made one thing clear – not all customers need multiple gantries, and both additive and subtractive capabilities,” stated Jonathan Schroeder, President of 3DP. “Also, many who need an extra-large format machine cannot afford to spend \$750k or more. Therefore, we set out to design a purpose-built machine for extra-large format additive manufacturing that wouldn’t break the bank.”

Bigger and more affordable

Enter the WorkCenter 500! Starting at under \$200k USD, this extra-large format 3D printer has been designed to provide affordability – without sacrificing quality or throughput. It uses a Fused Filament Fabrication (FFF) system and offers an extra-large build volume of 1.4 m x 2.8 m x 700 mm.

More options

WorkCenter 500 is currently the only machine on the market in the large format category to provide the option of pellet or filament extruder(s) – or both! These high volume extruders offer a choice of throughput rates ranging from 1.3 kg/hr to more than 7.5 kg/hr. Customers can then utilize a wide variety of open market filament / pellets and software that can deliver up to a 90% savings vs. closed eco-system machines.

Opportunities

3DP is now accepting applications for limited beta-sites and pre-order reservations. Interested businesses can contact 3DP at the information below.

About 3D Platform™

3D Platform is the trusted global leader in industrial-strength, large-format 3D printers. Based in Roscoe, Illinois, USA, the entire 3D Platform team is focused on driving advancements in technology to innovate, design, and build next-generation equipment for additive manufacturing.

Our global distribution network supported by Certified Service Providers has helped us deploy more large-format, open-market 3D printers than anyone else. To learn more about 3D Platform, visit www.3dplatform.com.
